

# Subtraction without borrowing

## Example : 1

Subtract  $17 - 6$

Solution:

-	Tens	Ones
	1	7
	0	6
		1

-	Tens	Ones
	1	5
	0	6
	1	1

### Step 1 :

In ones place, Subtract 6 from 7.

So,  $7 - 6 = 1$ .

Write 1 in ones place.

### Step 2 :

In Tens place, Subtract 0 from 1.

So,  $1 - 0 = 1$ .

Write 1 in ones place.

So, Answer is  $17 - 6 = 11$

## Example : 2

Subtract 13 - 11

Solution:

-

Tens	Ones
1	3
1	1
	<b>2</b>

-

Tens	Ones
1	3
1	1
<b>0</b>	<b>2</b>

### Step 1 :

In ones place, Subtract 1 from 3.

So,  $3 - 1 = 2$ .

Write 2 in ones place.

### Step 2 :

In tens place, subtract 1 from 1

So,  $1 - 1 = 0$

write 0 in tens place

So, Answer is  $13 - 11 = 2$

## Example : 3

Subtract  $28 - 16$

Solution:

-	Tens	Ones
	2	8
	1	6
		<b>2</b>

-	Tens	Ones
	2	8
	1	6
	<b>1</b>	<b>2</b>

### Step 1 :

In ones place, Subtract 6 from 8.

So,  $8 - 6 = 2$ .

Write 2 in ones place.

### Step 2 :

In tens place, subtract 1 from 2

So,  $2 - 1 = 1$

write 1 in tens place

So, Answer is  $28 - 16 = 12$

## Example : 4

Subtract  $36 - 12$

Solution:

-	Tens	Ones
	3	6
	1	2
		<b>4</b>

-	Tens	Ones
	3	6
	1	2
	<b>2</b>	<b>4</b>

### Step 1 :

In ones place, Subtract 2 from 6.

So,  $6 - 2 = 4$ .

Write 4 in ones place.

### Step 2 :

In tens place, subtract 1 from 3

So,  $3 - 1 = 2$

write 2 in tens place

So, Answer is  $36 - 12 = 24$

## Example : 5

Subtract  $42 - 21$

Solution:

-

Tens	Ones
4	2
2	1
	<b>1</b>

-

Tens	Ones
4	2
2	1
<b>2</b>	<b>1</b>

### Step 1 :

In ones place, Subtract 1 from 2.

So,  $2 - 1 = 1$ .

Write 1 in ones place.

### Step 2 :

In tens place, subtract 2 from 4

So,  $4 - 2 = 2$

write 2 in tens place

So, Answer is  $42 - 21 = 21$

## Example : 6

Subtract  $55 - 32$

Solution:

-

Tens	Ones
5	5
3	2
	<b>3</b>

-

Tens	Ones
5	5
3	2
<b>2</b>	<b>3</b>

### Step 1 :

In ones place, Subtract 2 from 5.

So,  $5 - 2 = 3$ .

Write 3 in ones place.

### Step 2 :

In tens place, subtract 3 from 5

So,  $5 - 3 = 2$

write 2 in tens place

So, Answer is  $55 - 32 = 23$

# Example : 7

Subtract  $67 - 33$

Solution:

-

Tens	Ones
6	7
3	3
	4

-

Tens	Ones
6	7
3	3
3	4

## Step 1 :

In ones place, Subtract 3 from 7.

So,  $7 - 3 = 4$ .

Write 4 in ones place.

## Step 2 :

In tens place, subtract 3 from 6

So,  $6 - 3 = 3$

write 3 in tens place

So, Answer is  $67 - 33 = 34$

## Example : 8

Subtract  $79 - 42$

Solution:

-	Tens	Ones
	7	9
	4	2
		<b>7</b>

-	Tens	Ones
	7	9
	4	2
	<b>3</b>	<b>7</b>

### Step 1 :

In ones place, Subtract 2 from 9.

So,  $9 - 2 = 7$ .

Write 7 in ones place.

### Step 2 :

In tens place, subtract 4 from 7

So,  $7 - 4 = 3$

write 3 in tens place

So, Answer is  $79 - 42 = 37$

## Example : 9

Subtract  $88 - 26$

Solution:

-	Tens	Ones
	8	8
	2	6
		<b>2</b>

-	Tens	Ones
	8	8
	2	6
	<b>6</b>	<b>2</b>

### Step 1 :

In ones place, Subtract 6 from 8.

So,  $8 - 6 = 2$ .

Write 2 in ones place.

### Step 2 :

In tens place, subtract 2 from 8

So,  $8 - 2 = 6$

write 6 in tens place

So, Answer is  $88 - 26 = 62$

# Example : 10

Subtract  $95 - 53$

Solution:

-	Tens	Ones
	9	5
	5	3
		<b>2</b>

-	Tens	Ones
	9	5
	5	3
	<b>4</b>	<b>2</b>

## Step 1 :

In ones place, Subtract 3 from 5.

So,  $5 - 3 = 2$ .

Write 2 in ones place.

## Step 2 :

In tens place, subtract 5 from 9

So,  $9 - 5 = 4$

write 4 in tens place

So, Answer is  $95 - 53 = 42$
